**FOR IMMEDIATE RELEASE**

## **Cargo Tracking**

Access Controls International introduces ECS Model 200 access control for trailer trucks. This system, easily installed on rear cargo doors, prevents unauthorized entry and tracks authorized users by personal identification with time and date. The on-board controller stores the last 500 events that can be expandable to 2500 events and can be extracted upon arrival at the terminal with a unique memory chip on a key fob. This tracking information can be viewed on a PC or laptop equipped with ECS Manager software. Up to 500 users can be added or deleted from the database then downloaded through the truck reader to the on-board controller using the same memory chip on a key fob.

The system comes complete. Includes: stainless steel outside reader, processor in a steel cabinet, electric lock, 2 memory chips on fobs, 25 user keys, programmer and Depo ECS Manager software. System operates off the 12-volt cab battery and retains information and program parameters when power is off.

For more information contact ACI Sales at 1-888-810-6060.
