**FOR IMMEDIATE RELEASE**

## **Access Controls International Offers a Digital Color Camera with 570 Lines of Resolution**

**May 30, 2000, New York** – Access Controls International, a leading developer of security technology systems and products is now offering its new line of Digital High-Resolution Color Cameras with **570-lines of resolution**. Now you can have the imaging performance in color that was previously available only with monochrome cameras. The camera features include 0.3-lux minimum illumination, backlight compensation, internal line lock and built-in isolated power transformer. It offers a signal-to-noise ratio of over 46 decibels, support for C and CS lens installations, a strong durable housing, shutter speeds as fast as 1/100,000 of a second and a 1/3-inch Interline Transfer CCD.

The WDAC-5700C Digital High-Resolution Color Camera, along with all of the technology available in ACI's Video Security Systems line, offers unparalleled reliability and quality. "Dealers nationwide now have the ability to economically provide the best in color camera imaging performance," said, ACI President, Paul Grossman. "We want to help the dealers expand their sales opportunities while delivering the highest levels of customer satisfaction."
