**FOR IMMEDIATE RELEASE**

## **Access Controls International Offers Our Passive Infrared Sensor**

**May 15, 2000, New York** – Access Controls International, a leading developer of security technology systems and products, is now offering its wall mount or post mounted Passive Infrared Sensor. Each sensor has a detection range of 30' and is used for inside space intrusion. A mini remote transmitter carried by security personnel shuts down the system for authorized passage. The system rearms automatically after a preset time period. Arm, disarm, test and alarm signals are sent over the wireless radio link to central station. The address, zone locations, alarm and supervisory signals are received, displayed and recorded at central with the time and date of each activity.

The RMD-1-LR Passive Infrared Sensor, along with all of the technology available in ACI's Detection line, offers unparalleled reliability and quality.

For more information contact ACI Sales at 1-888-810-6060.
