

PROX-WS

ECS Passive Long-Range Proximity Tag

The ECS PROX-WS passive proximity tag provides an ideal solution for long-range hands-free vehicle access. The PROX-WS is a paper-thin and small form factor passive tag that mounts directly onto a vehicle's windshield using a semi-permanent adhesive backing.

Used with the PR-LR-911 Long Range reader, the PROX-WS provides an industry best 9 to 11 foot, hands-free read range. Unlike other long-range hands-free tags, the PROX-WS tag does not require a battery and will therefore provide uninterrupted use for many years in such applications as parking/gated entrance and control, or indoor applications such as asset monitoring and tracking.

- **Technology:** Passive proximity at 902-928 MHz
Frequency-hopping limits interference and requires no FCC license
- **Security:** Prox-WS Tags can be programmed with trillions of unique codes
- **Long Life:** No battery required;
Capable of an infinite number of reads to assure years of maintenance-free operation
- **Read Range:** 9 to 11 feet using the LR-911 reader, when the WS tag is attached by self-adhesive to the inside of a vehicle's windshield
- **Warranty:** PROX-WS Tags are warranted for one year against defects in material and workmanship
